

ENVIRONMENTALLY FRIENDLY DETERGENTS AND DISINFECTANTS

Health and safety is
our priority

THE BIODEGRADABLE OXY'PHARM CONCEPT

An efficient and environmentally friendly concept to fight against all infections and contaminations in the food industry.

The solution is always a matter of combination.

Hygiene is a major issue in the food industry. The OXY'PHARM devices meet your needs for versatility and guarantee irreproachable bio-cleaning and bio-disinfection.

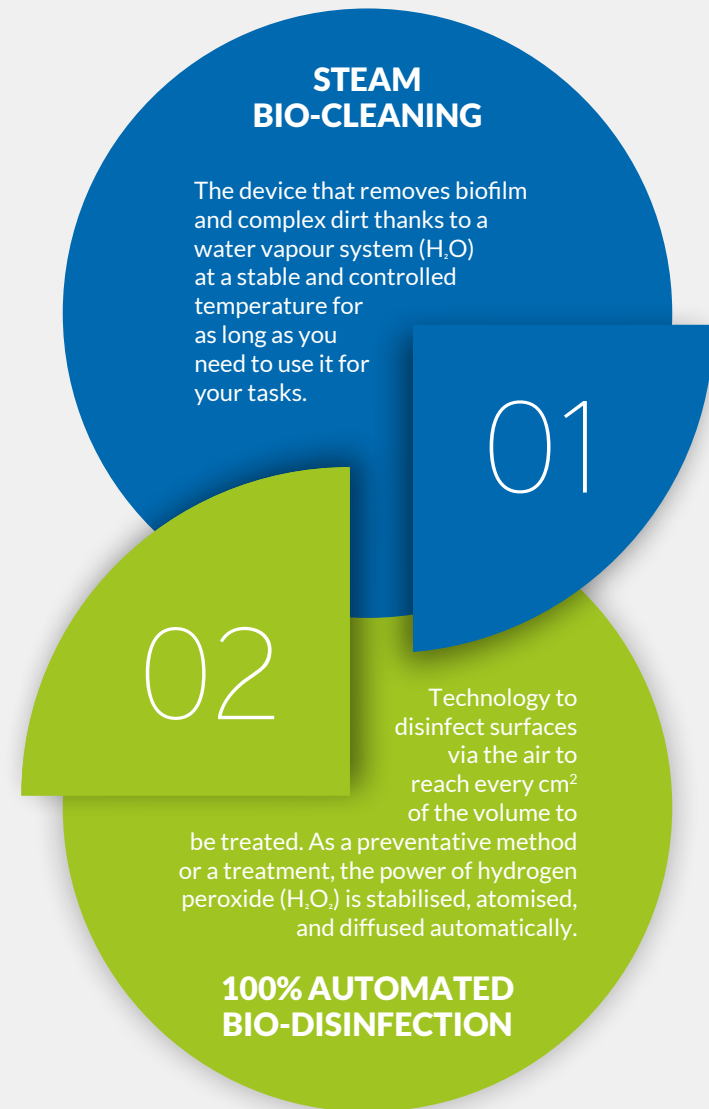

Because the solution is always a matter of combination, OXY'PHARM has implemented a complete hygiene concept with its range of SANIVAP and NOCOTECH products.

The treatments are perfectly adapted to the fields of manufacturing and processing of food products, as they are biodegradable and have no impact on the quality of the finished product, the material needed for production and the health of consumers.

This unique combination of **bio-cleaning** and **bio-disinfection** is effective, fast, easy, economical, environmentally friendly and safe.

We offer each of our customers training for the use of our SANIVAP and NOCOTECH devices.

THE STEAM BIO-CLEANING RANGE

Leader in steam bio-cleaning, the **SANIVAP** range has steam generators (SP540H, SP500/600 and SP800) and a variety of treatment accessories for thorough and effective cleaning. SANIVAP devices ensure bio-cleaning of surfaces on a daily basis: premises, furniture, equipment, etc.

THE ADVANTAGES

EFFICIENCY AND SAFETY

Effective on multi-resistant micro-organisms and without impact on the final product and consumers.

ECONOMICAL

The steam method forgets the use of detergents and disinfectants and reduces water consumption.

STEAM QUALITY

High-temperature steam, under pressure and with disinfectant while constantly controlling the parameters.

RELIABILITY AND PERFORMANCE

Intensive professional use and autonomy of 8 to 10 hours per day.

EASY TO USE

Mobile trolley, simple user interface, water level indicator and control, with self-draining and disinfecting tanks.

PRODUCTS SUITED TO YOUR NEEDS

SP540H

Our 2850W steam generator with a hydrogen peroxide solution injection.

SP500/600

Our 3450W steam generator with water-detergent injection.

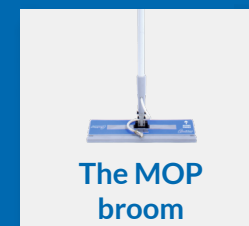

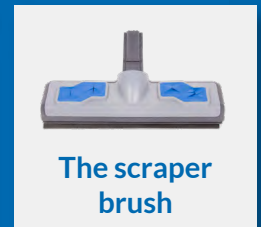

SP800

Our 3450W large capacity steam generator with water injection.

ACCESSORIES

The complete range of accessories developed by SANIVAP ensure optimum cleaning and disinfecting results as well as productivity and ergonomic.

100% AUTOMATED BIO-DISINFECTION RANGE

NOCOTECH is an automated concept for disinfecting surfaces with a dry spray. The NOCOTECH range is based on the coupled action of an automated surface treatment device (Nocospray or Nocomax) and a liquid disinfection product (Nocolyse Food). Airborne diffusion means that even surfaces in the most inaccessible areas can be treated.

THE ADVANTAGES

NO RISK

Biodegradable, residue-free, non-corrosive (including on electronic surfaces), non-toxic, non-allergenic.

EASY TO USE

Easy mode for adjusting the volume of the room to be treated (from 10 to 20,000 m³).

ECONOMICAL

Very low quantity of product required.

EFFECTIVENESS

Bactericide, virucide, sporicide and fungicide.

GUARANTEED TIME SAVING

No action required before treatment (except cleaning) or after treatment (no need to rinse).

PRODUCTS SUITED TO YOUR SURFACES

NOCOSPRAY

Our lightweight and portable machine for spraying surfaces. Volume of the room to be treated from 10 to 1000 m³.

Available as a wall mount.

NOCOMAX EASY

Our airborne diffusion machine dedicated to large volumes. Volume of the room to be treated from 500 to 20,000 m³.

Available in stainless steel and as a wall mount.

NOCOLYSE FOOD

Our ready-to-use disinfectant containing 7.9% hydrogen peroxide, silver-free, used to treat food contact surfaces (1L, 5L or 20L).

Available in 1L bottle, 5L container, 20L container.

LES ACCESSOIRES

The programmer

Allows the automatic activation of the spray whenever you want (various programs possible).

The remote control

Allows the Nocospray to be activated from outside the room.

Works only with Nocospray.

The bulkhead connection system kit

Allows you to disinfect a room without entering it.

Works only with Nocospray.

The double nozzle

Allows bi-directional diffusion and is well suited for long, narrow spaces such as corridors.

Works only with Nocospray.

EFFECTIVE TREATMENT AGAINST COVID-19

SARS-CoV-2, the virus responsible for Covid-19, is sensitive and reactive to the hydrogen peroxide disinfectants found in our SANIVAP and NOCOTECH devices.

OXY'PHARM certifies that the NOCOTECH disinfection system (system paired with NOCOSPRAY or NOCOMAX and NOCOLYSE devices), with its complete range of effectiveness (**bactericide**, **fungicide**, sporicide and **virucide**) is also effective against Covid-19.

The NOCOTECH system is conform with DAVA (disinfection of surfaces via the air) standards: NF 72-281 and EN 17272 (bactericide, fungicide, sporicide and virucide).

The **bactericide**, **yeasticide**, **fungicide** and **virucide** effect of the devices and accessories of the SANIVAP «steam only» range is proven by validations in certified laboratories and institutes. The SP 540H device with low-dose hydrogen peroxide injection also ensures a 4.3 and 3.8 log efficiency for **sporicide**.

SANIVAP devices are medical devices and comply with the standard: NF 72-110 (bactericide, yeasticide, fungicide and virucide).
