

Technical Data Sheet

1. Name of the Product

Agavox-N

2. Product Type

Agavox-N is a water-soluble granule for cleaning and disinfection of surfaces and materials of animal housing or transportation (PT3) on the basis of peracetic acid with a wide microbiological activity

3. Dosage

5 g granules per 500 ml of water produces a 1% solution, 10 g granules per 500 ml of water produces a 2% solution

4. Qualitative & Quantitative Composition

100 g granule contains active ingredients: Sodium percarbonate 42.00 g;
tetraacetylenediamine (TAED) 29.80 g

5. Packaging

Agavox-N is supplied as a 5kg or 10kg pack in a polypropylene/polyethylene bucket, and as a 1000g pack in a polypropylene/polyethylene tub.

6. Shelf-life

Agavox-N currently has a 3 year shelf life.

7. Certificates

To assure that Medentech products are manufactured to appropriate Quality Control standards, Medentech manufactures to standards of Good Manufacturing Practice (GMP) and is also an ISO9001 & ISO13485 Quality-Assured Company.

Inspections are undertaken on a regular basis by the Health Products Regulatory Authority, which is the responsible Authority in Ireland, for GMP conformance to European Standards. This ensures that all appropriate testing is undertaken to assure that the product meets specification, that the processes have been validated to produce a consistent product, that stability studies have been undertaken to International standards, that materials are selected and tested to meet specified standards and specifications etc.

Inspections to meet ISO9001 & ISO13485 requirements are undertaken biannually by NSAI (National Standards Authority of Ireland).
